## Cleaning a Janitor Closet

**DUSTBANE**  
Give Meaning To Your Cleaning 

Cleaning a janitor closet starts with a simple program. Ask us about a custom program that will meet your individual needs. Here's our baseline recommendation:

1

### Proportioning System: EnviroFlex

The EnviroFlex Proportioner is easy to use and can be installed in just a few minutes. It consistently dispenses the precise amount of chemicals regardless of water pressure. The system can be configured with 2 (1 GPM) + 2 (3.5 GPM) or 3 (1 GPM) + 1 (3.5 GPM), allowing for product and application flexibility to customize the system to your needs.

2

### Easy Filling and Pouring: Buddy Jug

This commercial-grade 20 L jug is user-friendly for easy filling and pouring of diluted chemicals into spray bottles. The jug is translucent so you can quickly see what's inside. It is ideal for storing liquids on a shelf.

3

### Dispensing System: ModularFlex

Proper cleaning starts with proper dilution. Up to 4 chemicals can be housed within the unit. It accommodates 2 liter bottles. Your chemicals are stored behind locked enclosures to protect both the users and your brand. It allows for safe manipulation of the chemicals by preventing any leaks or direct contact.

4

### Portable System: RiteFlex

No wall space available? The RiteFlex offers a portable means of accurately diluting concentrated cleaning products to fill mop buckets, sinks, auto-scrubbers, tanks and other containers.
