## Cleaning a Receiving Dock

**DUSTBANE**  
Give Meaning To Your Cleaning 

Cleaning a receiving dock starts with a simple program. Ask us about a custom program that will meet your individual needs. Here's our baseline recommendation:

1

### Cleaner & Degreaser: Complex Orange

Receiving docks are a busy place where dirt, grease and grime can quickly accumulate on floors and equipment. This causes slippery surfaces and could lead to a workplace injury. Complex Orange is a solvent free cleaner degreaser that quickly emulsifies and removes the toughest dirt and soils.

- Dilute in cold water at a rate of 1:30.
- Available in 4L, 20L & 210L.

2

### Floor Sealer: Foundation

Foundation stops concrete dusting, improves stain resistance, increases abrasion and crush resistance, and makes the surface less susceptible to damage from heavy traffic. Foundation achieves uncommon levels of durability and permanency for total sealer protection. APE and odour free. UL ECOLOGO® Certified.

- Two to three coats recommended.
- Available in 4 L & 20 L.

3

### Ice Melt Remover: Film Away

Ice melts are commonly used around receiving docks and tend to get dragged into the receiving area. If left unattended, ice melt residue can damage the concrete floor. Using Film Away can efficiently get rid of the residue while neutralizing the floor. UL ECOLOGO® Certified.

- Available in 4 L.

4

### DB24

An industrial wet/dry vacuum for all your heavy-duty messes. The DB24 is built with a tough tank for aggressive movements and powerful cleanup. Boasts an integrated drainpipe for efficient disposal after use. Made of up to 75% recycled plastic.

- cUL Certified
- Includes all necessary tools & accessories
