

The Dustbane Way

Cleaning a Greenhouse

Cleaning a greenhouse starts with a simple program. Ask us about a custom program that will meet your individual needs. Here's our baseline recommendation:

1

Disinfectant: UniTab

UniTab's gentle formula is non-corrosive and doesn't generate fumes which could be harmful for plants. It's effective against a broad range of microorganisms and is a safer alternative to bleach. DIN: 02470381.

- Dilute 2 tablets per 1 L of water for disinfection.
- Dilute 1 tablet per 20 L of water for sanitizing.

2

Hard Surface Cleaner: Oxy-Q

A hydrogen peroxide based disinfectant can prevent the growth of algae and viral plant pathogens in a greenhouse. Oxy-Q has limitless cleaning options and is perfect for removing residues and dirt off of hard surfaces. UL ECOLOGO® Certified.

- Dilute in cold water at a rate of 1:256.
- Available in 4 L.

3

Floor Cleaner: Emerald

Dirt, mud and debris are no match for Emerald. Use to cut through heavily soiled floors with safe but powerful ingredients. Emerald is suitable for all washable surfaces and contains no solvents or phosphates. UL ECOLOGO® Certified.

- Dilute in cold water at a rate of 1:80.
- Available in 4 L.

4

DB7

Our most versatile vacuum, perfect for a variety of commercial or industrial facilities! Captures airborne particles, built-up debris, and wet abrasion without the need for an additional filter. Made of up to 75% recycled plastic.

- cUL Certified
- Includes all necessary tools & accessories

Note: Plants and greenery must be removed before any chemical application.
