

Pinosan

Fresh-scented daily disinfection for high-traffic facilities

About this product

Pinosan is a pine-scented disinfectant cleaner designed for facilities that need dependable daily cleaning, odour control, and broad-spectrum disinfection in one step. It helps maintain clean, fresh-smelling spaces in commercial buildings, schools, fitness centres, healthcare facilities, property management settings, and public areas where occupant perception is important.

Ideal for high-traffic and moisture-prone areas, Pinosan helps control odours caused by microorganisms while supporting mould and mildew control on treated surfaces. Its fresh pine fragrance reinforces the perception of cleanliness, making it a strong choice for washrooms, locker rooms, garbage areas, corridors, and other spaces that need to stay fresh between cleaning routines.

DIN: 02213133

- Cleans, disinfects, and deodorizes in one step to simplify daily maintenance routines
- Fresh pine fragrance helps reinforce the perception of a clean, well-maintained facility
- Helps control odours caused by microorganisms in washrooms, locker rooms, garbage areas, and other odour-prone spaces
- Supports mould and mildew control in high-moisture areas where freshness is harder to maintain
- Broad-spectrum disinfectant performance for routine facility hygiene programs
- Will not dull floor finishes, making it suitable for daily floor and surface maintenance
- Concentrated formula with flexible dilution rates helps facilities adjust use for normal cleaning, heavy-duty cleaning, and disinfection
- Suitable for occupied spaces where both cleaning performance and a pleasant fragrance are important
- Approved for use in applicable food plant when followed by potable water rinse procedures and industrial settings
- Suitable for most washable hard, non-porous surfaces

Dilution rates:

Normal Cleaning	1:40 - 1:80
Disinfection, Mold & Mildew	1:40
Heavy Duty Cleaning	1:20 - 1:40

**10 MINUTE
DISINFECTION**

Freshness & Odour Control Advantage

Effective against bacteria, fungi, and viruses while helping control odours caused by microorganisms in washrooms, locker rooms, garbage areas, and other high-moisture environments. Supports mould and mildew control while maintaining fresh-smelling facilities.
