

Vanguard RTU

Superior disinfection ready to go!

About this product

With all the enhanced cleaning protocols now in place, the demand for ready-to-use products has never been greater. Achieve optimal disinfection without worrying about proper dilution and carrying dilution systems. Vanguard RTU is designed to simplify the cleaning and disinfecting process while remaining a safe alternative for your staff – no PPE required. The same great formula and results you have come to expect from Vanguard in the convenience of a pre-diluted, ready-to-use product. It remains highly efficient in destroying a broad range of bacteria, viruses, fungi, and other microorganisms from hard surfaces, and effectively inhibits the growth of odour-causing mold and mildew.

DIN: 02504731

- Effective, one-step disinfectant cleaner
- Fifth generation disinfectant cleaner
- Destroys a broad range of bacteria, fungi, and viruses
- Does not require personal protection equipment (PPE)
- Leaves the area smelling fresh and clean
- Fast, easy and effective for peace of mind
- Reduces risks of cross-contamination on surfaces
- Safe for food contact surfaces

Disinfection Tip

Cleaning and disinfecting helps to prevent the spread of germs that may cause illness. To ensure proper disinfection, remember a very important fact:

C (cleaning) comes before D (disinfection).

Cleaning is an important first step because it removes dirt, organic matter and most germs from surfaces, but does not destroy some harmful germs that may remain. All surfaces must be thoroughly cleaned before disinfection to ensure there are no hidden germs.
