

Clean

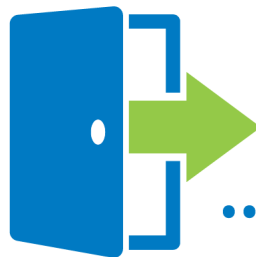

# RIGHT . FIND YOUR MATCH

## FLOOR AREA

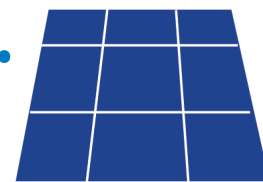

Consider the **CLEANABLE SQUARE FOOTAGE** over the total square footage. Choose the auto-scrubber that will be productive for all the spaces over one based on the largest space.

## DOOR WIDTH

Take note that the widest section of the scrubber is the squeegee to **ENSURE IT FITS** in your facility door width.

## FLOOR TYPE

Identify the type of floor you are cleaning. More uneven and abrasive floors will **REQUIRE MORE POWER** to turn the pads.

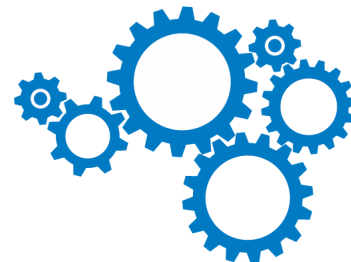

## DIRT TYPE

Consider the type of dirt the auto-scrubber will be tackling. Soils from a construction site or larger debris **MAY REQUIRE A LARGE POWERFUL** floor scrubber while the usual office dirt may just need a low-impact scrubber.

## FREQUENCY OF CLEANING

The more you use the machine, the more having a **HIGH-QUALITY MACHINE** will be important.

## TRACTION VS NO TRACTION

Auto-scrubbers that boast a traction feature (or self-propelled) increase productivity while **REDUCING THE OPERATOR'S FATIGUE**.

## AUTO-SCRUBBER DECK TYPE

### Brush/Disk

Provide the most pressure, but are not ideal for porous floor surfaces such as concrete.

### Cylindrical

The rollers work together to trap debris into a bin mounted behind the scrub head. They are ideal to clean porous floors.

### Drive Pad

Most versatile. They use less water, energy and solution consumption.

## TANK SIZE

Choose an auto-scrubber that has **AMPLE TANK SPACE** so time isn't wasted with refilling and emptying.

## NOISE LEVEL

Operations running 24/7 or the ability to **CLEAN DURING WORK HOUR** can be possible with an auto-scrubber that make very little noise.

## REDUCED WATER USAGE

**ECO-FRIENDLY** auto-scrubber will offer reduced water consumption as well as reduced chemical consumption.

## ERGONOMICS

The auto-scrubber should be convenient, easy to use, and ergonomic to **EASE REPETITIVE MOVEMENTS** that could lead to injuries.
