The UL ECOLOGO® program conducts facility re-audits every three years for non-ISO 9001 certified facilities, and every four years for ISO 9001 certified facilities, provided there have been no major changes that would affect the audit results within the three-year period. Major changes include, but are not limited to, manufacturing process changes or relocation of manufacturing facility, etc. UL ECOLOGO® reserves the right to request more frequent re-auditing at an additional cost if it is deemed necessary; however, these decisions will be made on a case-by-case basis and only after careful consideration. If there are multiple manufacturing facilities, at request, UL ECOLOGO® can adjust the schedule to prevent all audits from occurring in the same year.
